ENVIRONMENTAL POLICY STATEMENT

We recognize that it is our basic corporate responsibility to ensure that we meet our needs of today without compromising the needs of future generations. We envisage affluent lifestyles in harmony with the Earth as an ideal situation of mankind. We are committed to the distribution, servicing and end of life management of our products in a responsible, safe and environmentally sensitive manner. We will contribute to realizing a sustainable society through three fundamental principles of environmental stewardship:

Compliance

Comply with all applicable legal and other requirements, including:

- Product end of life management compliance

Pollution Prevention

Proactively prevent or minimize pollution by:

- Reducing waste going to landfill
- Reducing energy consumption

Continuous Improvement

Continually improve environmental performance through:

- Hosting one environmental event at every site

The environmental policy statement and its supporting objectives will be reviewed annually by top management for continuing suitability and to ensure communication and understanding at all levels of the organization.
